Extraction form

This is the data extraction form for the project: "Has research transparency improved in clinical psychology? A repeated cross-sectional study of 2012, 2018, and 2024".

* Indicates required question

1. Coder initials *

Mark only one oval.

- BK
- TEH
- JB
- Other: _____

2. Article ID *

Copy & paste the article ID number

_____

3. Year *

Mark only one oval.

- 2012
- 2018
- 2024

4. Is the article written in English? *

Mark only one oval.

- YES
- UNCLEAR
- NO

5. Is the article reasonably classified as "clinical psychology"? *

Mark only one oval.

- YES
- UNCLEAR
- NO

ACCESS

6. Can you view a version of this article? *

Mark only one oval.

- Yes
- No — I cannot access any version of the article
- Other: _____

ARTICLE VERSION

All of the remaining questions in this form should be answered based on the version-of-record where possible. The version-of-record is the article available on the journal's website. If the version of record is unavailable, you can use an alternative open access version.

Please store the version of the article you are coding (preferably a PDF) in [this folder]. For the filename, enter the article ID followed by an underscore and your initials. For example: "502_TEH.pdf"

7. Which version of the article are you coding? *

Mark only one oval.

- Journal's version of record
- An alternative open access version
- Other: _____

RESEARCH DESIGN

Definitions: "Empirical research" means a study must involve the analysis of quantitative or qualitative data. This includes primary or secondary data analysis, but excludes evidence synthesis (e.g., meta-analysis). Thus, empirical research includes experimental studies, observational studies, or secondary data analyses. Empirical research excludes meta-analyses, systematic reviews, essays, opinion pieces, news, simulations, and theory articles.

8. Does the article report empirical research? *

Mark only one oval.

- Yes
- Unclear
- No

9. What is the research design? (tick all that apply)

Check all that apply.

- [ ] Primary research study
- [ ] Secondary analysis
- [ ] Other: _____

10. What is the data type? (tick all that apply

Check all that apply.

- [ ] Qualitative data
- [ ] Quantitative data
- [ ] Other: _____

PREREGISTRATION

Definitions: "Preregistration" refers to the public specification of important aspects of the study (typically hypotheses, methods, and/or analysis plan) prior to commencement of the study. A "Registered Report" is a specific article format that involves a study being accepted for publication in principle at a journal before the study begins.

Coder instructions: Aim to find a preregistration statement. Firstly, search the document for the keyword "**regist**" (to cover registration, preregistration, registered, etc). If insufficient information is found during the keyword search, manually examine specific sections where preregistration might be mentioned, e.g., front matter, abstract, methods, results, disclosure statements after the discussion section. If the article is a Registered Report then that exact term should be used.

11. Does the article state whether or not the study (or some aspect of the study) was preregistered? *

Mark only one oval.

- ( ) YES — the statement says that there is a preregistration
- ( ) YES — the study is a Registered Report
- ( ) YES — the statement says that there is no preregistration
- ( ) NO — there is no statement about preregistration *Skip to question 15*
- ( ) Other: _____

PREREGISTRATION DETAILS

12. Copy and paste the verbatim preregistration statement *

13. How is the preregistration accessed? (according to the statement) *

Mark only one oval.

- Open Science Framework
- AsPredicted
- ClinicalTrials.gov
- Registered Report
- Other:

14. Can you access and view the preregistration (without contacting anyone)? *

Mark only one oval.

- YES
- NO
- Other:

DATA SHARING

Definitions: “data” refers to recorded information that supports the analyses reported in the article. For our purposes, we use “data” synonymously with “raw” or “primary” data, meaning recorded information at the level of sampling units (e.g., participants, homes, companies, etc). Summary level data does not count for our purposes. A “data availability statement” can be as simple as a URL link to a data file, or as complex as a written explanation as to why data cannot be shared.
Coder instructions: Aim to find a data availability statement or link to data. Firstly, search the document for the keyword “**data**” and then for the keyword “**avail**”. If insufficient information is found during the keyword search, manually examine specific sections where data availability might be mentioned, e.g., front matter, author notes, abstract, methods, results, disclosure statements after the discussion section, and supplementary material.

15. Does the article state whether or not data are available? *

Mark only one oval.

- YES — the statement says that the data are available *Skip to question 17*
- YES — the statement says that the data are not available *Skip to question 19*
- UNCLEAR — the statement says that the data may be available but access is restricted *Skip to question 19*
- UNCLEAR — the statement says that the data are available on request *Skip to question 19*
- NO — there is no data availability statement *Skip to question 21*
- Other: _____

16. Copy and paste the verbatim data statement (if there is one)

_____
_____
_____
_____
_____

DATA SHARING YES DETAILS

17. How are the data accessed? (according to the statement) *

Mark only one oval.

- Personal or institution website
- An online, third-party repository (e.g., OSF, FigShare etc.)
- Supplementary materials hosted by the journal
- Within the article (or appendices)
- From a third party
- Other: _____

18. Can you access, download, and view the data (without contacting anyone)? *

Mark only one oval.

- YES
- NO
- Other: _____

Skip to question 21

DATA SHARING RESTRICTED DETAILS

19. Did the authors provide any reasons for not sharing or restricting access to the data? *

Mark only one oval.

- YES
- NO
- Other: _____

20. Copy and paste the verbatim reasons for restricted data access (if any)

_____
_____
_____
_____
_____

MATERIALS (MEASURES) SHARING

Definitions: In general "materials" refers to any study items that would be needed to repeat the study. In this study, we will focus on study measures (including clinical assessment tools, surveys, test batteries, or other measures).

Coder instructions: Aim to find a materials availability statement or link to materials. Search the document for the keywords "material", "instrument", "questionnaire", and "survey". In addition to the keyword search, manually examine the methods sections and any supplementary materials.

21. Does the article state whether or not any measures are available? *

Mark only one oval.

- YES — the statement says that all or some measures are available *Skip to question 23*
- YES — the statement says that the measures are not available *Skip to question 25*
- UNCLEAR — the statement says that the measures may be available but access is restricted *Skip to question 25*
- UNCLEAR — the statement says that the measures are available on request *Skip to question 25*
- NO — there is no measures availability statement *Skip to question 27*
- Other: _____

22. Copy and paste the verbatim measures statement(s) (if there are any)

_____
_____
_____
_____
_____

MATERIALS (MEASURES) SHARING YES DETAILS

23. How are the measures accessed? (according to the statement) *

Mark only one oval.

- Personal or institution website
- An online, third-party repository (e.g., OSF, FigShare etc.)
- Supplementary materials hosted by the journal
- Within the article (or appendices)
- From a third party
- Other: _____

24. Can you access, download, and view the measures (without contacting anyone)? *

Mark only one oval.

- YES
- NO
- Other: _____

Skip to question 27

MATERIALS (MEASURES) SHARING RESTRICTED DETAILS

25. Did the authors provide any reasons for not sharing or restricting access to the measures? *

Mark only one oval.

- YES
- NO
- Other: _____

26. Copy and paste the verbatim reasons for restricted measures access (if any)

ANALYSIS SCRIPT SHARING

Definition: "Analysis script" refers to specification of data preparation and analysis steps in the form of analysis code (e.g., R), syntax (e.g., from SPSS), or detailed step-by-step instructions for using point-and-click software.

Coder instructions: Aim to find an analysis script availability statement or link to analysis scripts. Firstly, search the document for the keyword "**analysis script**" and then for the keyword "**analysis code**". If insufficient information is found during the keyword search, manually examine specific sections where analysis scripts might be mentioned, e.g., front matter, author notes, abstract, methods, results, disclosure statements after the discussion section, and supplementary material.

27. Does the article state whether or not analysis scripts are available? *

Mark only one oval.

- YES — the statement says that the analysis scripts are available *Skip to question 29*
- YES — the statement says that the analysis scripts are not available *Skip to question 31*
- UNCLEAR — the statement says that the analysis scripts are available on request *Skip to question 31*
- UNCLEAR — the statement says that the analysis scripts may be available but access is restricted *Skip to question 31*
- NO — there is no analysis script availability statement *Skip to question 33*
- Other:

28. Copy and paste the verbatim analysis script statement (if any)

ANALYSIS SCRIPT SHARING YES DETAILS

29. How is the analysis script accessed? (according to the statement) *

Mark only one oval.

- Personal or institution website
- An online, third-party repository (e.g., OSF, FigShare etc.)
- Supplementary materials hosted by the journal
- Within the article (or appendices)
- From a third party
- Other:

30. Can you access, download, and view the analysis script (without contacting anyone)? *

Mark only one oval.

- YES
- NO
- Other:

Skip to question 33

ANALYSIS SCRIPT SHARING RESTRICTED DETAILS

31. Did the authors provide any reasons for not sharing or restricting access to the analysis scripts? *

Mark only one oval.

- YES
- NO
- Other: _____

32. Copy and paste the verbatim reasons for restricting analysis script access (if any)

_____
_____
_____
_____
_____

REPORTING GUIDELINES

Definitions: Reporting guidelines are checklists detailing a minimum set of methodological information that should be provided for a particular research design.

Coder instructions: Aim to find mention of a reporting guideline. Firstly, search the document for the keyword “guide” (guideline, reporting guideline). Secondly, search for the keyword "check" (checklist, check-list). If insufficient, search for particular guidelines depending on the research design:

Experimental studies: CONSORT, SPIRIT, TIDieR, CONSERVE (for covid-related studies)
Observational studies: TRIPOD, STROBE, STARD, RECORD, CARE, STREGA
Qualitative studies: COREQ, SRQR
All studies: APA-JARS

If insufficient information is found during the keyword search, manually examine specific sections where reporting guidelines might be mentioned, e.g., methods sections or, disclosure statements after the discussion section.

33. Is there a statement declaring the use of one or more reporting guidelines? *

Mark only one oval.

- YES — the statement discloses use of at least one reporting guideline
- NO — there is no statement related to reporting guidelines
- Other: _____

34. Copy and paste the verbatim reporting guideline statement (if any)

_____
_____
_____
_____
_____

35. Which guidelines were used (if any)? (select all that apply and use the other option if necessary)

Check all that apply.

- [ ] CONSORT
- [ ] SPIRIT
- [ ] STROBE
- [ ] COREQ
- [ ] SRQR
- [ ] APA-JARS
- [ ] Other: _____

FUNDING DISCLOSURE

Definition: “Funding” refers to any financial support related to the study or the researcher running the study.
Coder instructions: Aim to find a funding disclosure statement. Firstly, search the document for the keyword “**fund**” (to cover funder, funding, etc). If insufficient information is found during the keyword search, manually examine specific sections where funding statements might be mentioned, e.g., front matter, author notes, abstract, methods, results, disclosure statements after the discussion section, and supplementary material.

36. Does the article include a statement indicating whether there were funding sources? *

Mark only one oval.

- YES — the statement discloses at least one source of funding
- YES — the statement says that there was no relevant funding
- NO — there is no funding statement *Skip to question 38*
- Other: _____

FUNDING DISCLOSURE DETAILS

37. Copy and paste the verbatim funding statement. *

_____
_____
_____
_____
_____

CONFLICT OF INTEREST DISCLOSURE

Definition: “Conflicts of interest” or “competing interest” refers to self-serving factors (usually financial) that could potentially influence a researcher’s conduct or decision-making.

Coder instructions: Aim to find a conflict of interest or competing interest disclosure statement. Firstly, search the document for the keyword “**conflict**” and then search for the keyword “**competing**”. If insufficient information is found during the keyword search, manually examine specific sections where conflict of interest statements might be mentioned, e.g., front matter, author notes, abstract, methods, results, disclosure statements after the discussion section, and supplementary material.

38. Does the article include a statement indicating whether there were any conflicts of interest? *

Mark only one oval.

- YES — the statement discloses at least one conflict of interest
- YES — the statement says that there were no conflicts of interest
- NO — there is no conflict of interest statement *Skip to question 40*
- Other: _____

CONFLICT OF INTEREST DISCLOSURE DETAILS

39. Copy and paste the verbatim conflict of interest statement. *

_____
_____
_____
_____
_____

Anything interesting or problematic to note?

40. You can use this space to record anything interesting or problematic about this article
